

MORE CITIZEN SCIENCE PROJECTS WITH LINKS TO WEB PAGES

If you have tried the projects from our introduction to citizen science, this list shows some more. This page has some that run all year round and the next has a calendar showing shorter term projects by month.

[Shoresearch | The Wildlife Trusts](#) is a citizen science survey of the inter-tidal shore.

[Nature's Calendar \(woodlandtrust.org.uk\)](#) helps scientists discover the effect of weather and climate on timings in wildlife.

[About Garden BirdWatch | BTO - British Trust for Ornithology](#) This runs all year long.

[Hedge surveys \(ptes.org\)](#) People's Trust for Endangered Species offers several different types of hedgerow survey to find out about the condition of hedgerows and how best to manage them for wildlife.

[Citizen Science - Buglife](#) has useful resources for identifying and surveying insect life.

[BIG Hedgehog Map](#) is an interactive map to add your own sightings and see those others have contributed.

[A Community for Naturalists · iNaturalist](#) iNaturalist is an international platform where you can record, share, and discuss your observations of nature. You can also contribute to biodiversity science, join projects, and learn from other naturalists.

[Citizen Science \(cornell.edu\)](#) has details of a range of individual citizen science projects and runs [Merlin Bird ID – Free, instant bird identification help and guide for thousands of birds – Identify the birds you see \(allaboutbirds.org\)](#)

The Natural History Museum has an excellent page with links to monitoring and survey projects for different times of year.

[Survey calendar for beginners | Natural History Museum \(nhm.ac.uk\)](#) - a useful starting point with links to other projects.
